OTHER SCENARIOS

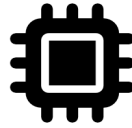

I have a GG3 on order, but not yet delivered

Your order is automatically upgraded to a GG3-S. Please keep an eye on your email inbox for your final balance or fulfillment emails.

I have a GG1 / GG2

The Ghost Gunner models 1 and 2 are venerable machines that reached their end of life in 2020. Because we no longer officially support these machines, we also cannot offer an upgrade path to a GG3 or GG3-S. We do not recommend attempting optic cuts on these machines.

EXISTING OWNERS: GG3 UPGRADE

Firmware upgrade

Cost: Free!

For all GG3 owners

This firmware update will increase cutting power up to 17x, allow full spindle power at all RPMs, and will enable improved steel cuts.

1. Install latest DDCut.
Visit ghostgunner.net/downloads and click "DDCut V" to download the latest version.
2. Upgrade firmware. Connect GG3 to your PC and open DDCut. Go to Settings > Software and run automatic firmware updater.

Hardware upgrade

Cost: \$299

Valuable for FFLs, commercial owners and power users.

This hardware upgrade is performed at the Ghost Gunner factory. It increases table rigidity by 4x and improves chip protection and sealing.

1. Visit ghostgunner.net/upgrade to purchase the GG3-S upgrade package.
2. Instructions on shipping your machine to the factory and further information will be provided after purchase.
